Profile

Software Development Engineer with experience in full-stack solutions, systems integration and process automation across enterprise, education and retail environments. I combine C# / .NET, Python, Angular and React with Azure and Google Cloud services. At Haceb, I focus on AI architecture: agents, APIs and data workflows using Cloud Run and BigQuery. I design scalable, maintainable solutions that connect technology with business needs, with attention to performance and user experience.

Experience

Industrias Haceb S.A.

Apr 2026 - Present

Software Engineer | Focus on AI architecture

- Develop AI agents and integrations with MCP and APIs for internal processes at a home appliance manufacturer.
- Implement backend services and business logic on Cloud Run; integrate and ingest data from APIs into BigQuery.
- Work with Gemini, Claude, Agent Platform, Copilot Studio and Antigravity across AI and software development initiatives.
- Build React applications, integrate enterprise systems and support business applications.

Universidad EAFIT

Sep 2025 - Apr 2026

Software Developer

- Built conversational agents with Copilot Studio for student services; designed 4 conversation flows with business logic and optimized prompts.
- Integrated Azure AI Foundry, OpenAI and BotFramework-WebChat into a portal built with Angular 20, TypeScript and .NET Core.
- Implemented MSAL authentication, Application Insights telemetry and infrastructure on Azure App Services and Bot Services.

Grupo Éxito

Jul 2024 - Jan 2025

Software Developer & Analyst

- Developed automated reporting with Gemini, Python, Node.js and TypeScript; deployed microservices on Cloud Run, used Cloud Storage and analyzed data with BigQuery.
- Built the “Just for You” recommendation module, integrating Node.js, Python and recommendation engines.

Skills

Python | JavaScript / TypeScript | React | C# / .NET | APIs | SQL | GCP | Azure | BigQuery | Cloud Run | Gemini | Claude | Copilot Studio | MCP | AI architecture | Automation

Additional Experience

Flexo Lumens
Feb 2020 - Jul 2023

Software Developer

- Built inventory and lighting control modules with ASP.NET Core, C# and SQL Server, and web interfaces with Angular and TypeScript.
- Integrated REST APIs and JWT authentication; contributed to legacy migrations using SOLID principles and Clean Architecture.

Independent
Aug 2019 - Present

Freelance Full-Stack Developer

- Built and maintained e-commerce platforms and web applications with React, Angular, Node.js, PHP, CodeIgniter and MySQL.
- Integrated payment gateways and supplier APIs; automated tasks with Python and deployed applications on Google Cloud and cPanel.

Software Estratégico
Sep 2018 - Jul 2019

Software Analyst

- Built ASP.NET MVC and C# modules, wrote SQL Server queries, maintained .NET applications and created reports with Crystal Reports.

1cero1 Software SAS
Dec 2017 - May 2018

Junior Developer

- Maintained .NET and WinForms applications; developed Bitcoin ATM software integrated with the CoinPayments API.

Renault Sofasa
Feb 2015 - Aug 2015

Junior Software Analyst

- Supported AS/400 systems, automated reports and queried data for after-sales processes and spare parts pricing.

Education & Languages

Software Development Engineering | 2021 - 2025
Institución Universitaria Pascual Bravo
Technology Degree in Software Development | 2012 - 2016
Institución Universitaria Pascual Bravo
High School Diploma | 2005 - 2011
Institución Educativa Francisco Antonio Zea

Languages
Spanish: native.
English: A2+.
Technical reading and documentation comprehension.

Technical Skills

Frontend
Angular (CLI, Material, Forms, RxJS), React (Hooks, Context API), HTML5, CSS3, Bootstrap, AJAX.

Backend
ASP.NET Core, Entity Framework Core, Node.js / Express, REST APIs, JWT.

Data
SQL Server, PostgreSQL, MySQL, Teradata, MongoDB, BigQuery.

Cloud & DevOps
Azure App Services, GCP, Cloud Run, Docker, Git, GitHub Actions, Azure DevOps, CI/CD, cPanel.

Testing
xUnit, Jest, Jasmine, NUnit, Postman, Swagger.

Practices
SOLID, Clean Architecture, Scrum, Kanban, Git Flow. Python for automation and data processing.
